EXAMINER'S ACTION

Art Unit: 1502

Claims 1-10 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 8 and 11-14 'surfaces' is vague; surfaces of what entities?

In claim 1, 8, 'synthetic polymer' is ^gvalue; which ones?

The disclosure is objected to because of the following informalities: On page 1, line 14 serial numbers are missing. Appropriate correction is required.

On page 3, line 16; page 6, line 8; page 7, lines 8, 17 and 24; page 14, lines 1, 8; page 18, line 17; page 21, line 6 'etc' does not limit the scope of the disclosure. 'And the like' is suggested.

On page 18, line 16 dimethylacrylamide is not polymer.

Claims 1-14 are rejected under 35 U.S.C. § 112, first paragraph, as the disclosure is enabling only for claims limited to that which is disclosed. See M.P.E.P. §§ 706.03(n) and 706.03(z).

Art Unit: 1502

Applicants, on page 17, lines 13-15, disclose PVP, CMC and hyaluronic acid. On page 18, line 16 PEG and copolymers of PEG and dimethylmethacrylate are specified. Applicants, in the examples demonstrate utility for PVP, CMC, and hyaluronic acid. There is no showing for any polypeptide. However, applicants claim any polysaccharide, any synthetic polymer and any polypeptide. Thus, the specification is insufficient to support the breadth of the claims.

Claims 1-14 are rejected under 35 U.S.C. § 112, first paragraph, as the disclosure is enabling only for claims limited to that which is disclosed. See M.P.E.P. §§ 706.03(n) and 706.03(z).

On page 19, line 1, applicants disclose polyelectrolyte polysaccharides. No others are disclosed.

However, applicants claim all polysaccharides, thus, the specification is insufficient to support the breadth of the claims.

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 5,080,893. Although the conflicting claims are

Art Unit: 1502

not identical, they are not patentably distinct from each other because the inventing concept of the instant claims are generic to 5,080,893.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Vogel*, 164 USPQ 619 (CCPA 1970): A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).

No claims allowed.
